Table 1 Made-up measures of made-up people, n (%)

	Group A	Group B	Total
Number	30 (60%)	20 (40%)	50
Made-up section			
First	12 (40%)	8 (40%)	20 (40%)
Second	18 (60%)	12 (60%)	30 (60%)
Mean size of the measure	3.1 (0.4)	3.3 (0.5)	3.2 (0.4)
Other	1 (3%)	2 (10%)	3 (6%)

a Made-up test: U = 12, z = 0.5, for testing only.
b A short note.

The second column has running text of its own, set beside the table in the first, and it is read after the table, a line at a time, as the rest of a page is. None of the words here mean anything at all, and the numbers in the table beside them were made up for testing the ruler, which should go through the whole table a row at a time rather than skipping most of it, and then carry on with this column.
