Page 1 of a made-up paper

This made-up paper is about steel, concrete and timber, and none of it is real.

Its pages have text of their own, as most papers do, so they are searched as they are.

Only its last page is a picture of words, which has to be recognised before it is searched.

Page 2 of a made-up paper

This made-up paper is about steel, concrete and timber, and none of it is real.

Its pages have text of their own, as most papers do, so they are searched as they are.

Only its last page is a picture of words, which has to be recognised before it is searched.

Page 3 of a made-up paper

This made-up paper is about steel, concrete and timber, and none of it is real.

Its pages have text of their own, as most papers do, so they are searched as they are.

Only its last page is a picture of words, which has to be recognised before it is searched.

Appendix: Made-Up Beams

A made-up beam bends under a made-up load.
The deflection grows with the cube of its length.
Nothing here is real, and it is only for testing.
